Manufacturer & Supplier of Pneumatic Equipment

Issue Five

SPECIAL SOLUTIONS

RGS ON CD

RGS has always been able to offer special solutions to customers' particular electro-pneumatic problems.

Recently a customer in Australia wanted to be able to manually override their pneumatic actuators, without disturbing the associated electro-pneumatic positioners. The existing arrangement of separate manual valves was on occasions unreliable and required the exhaust air from the actuator to pass through the positioner valve. The RGS solution provided a much more compact and user friendly design that was clearly labelled and could use the Namur interface on the actuator.

The 7 port, 3 position valve design also included the flexibility to allow it to be set up to work with any of the three different valve configurations on the site, which had previously required different piping arrangements. Contact RGS with your difficult applications to discuss the elegant, cost effective solutions that RGS can provide.

From the New Year RGS's solenoid valve catalogue will be available on CD as part of the Technical Indexes service.

The same information is also available on Technical Indexes' web site at www.specifyit.com. RGS has also prepared *.pdf file versions of all the catalogue pages, which are available by e-mail on request.

RGS EMPLOYEE NEWS

Owen Birtwistle is retiring after 32 years with RGS, 15 of which as Managing Director.

Owen will still retain links with RGS as a Technical Consultant, so he will not yet be able to devote all his time to improving his handicap! After leading the company through so many changes and developments, all the staff and Directors of RGS and the Parmeko Group would like to wish Owen and Ann a long and happy retirement. John Watson has taken over as Managing Director.

The management of RGS would like to congratulate the following employees on achieving NVQ Certificates:

Assembly NVQ Level 2

- Roma Astley	- Jason Callaghan
